

Strausak AG has been active for many decades in the manufacture of CNC machines for sharpening cutting tools and is present on the world market. To support our continued growth and strengthen our organization at our Biel site, we are looking for the following profile, either immediately or by arrangement:

Field Service Technician (w/m) 100 %

Your field of activity:

- After a training period, you will provide after-sales service to our Swiss and international customers.
- Carry out mechanical and electrical repairs and overhauls at customer sites.
- You install machines directly on customer premises.
- When you're not at the customer's premises, you'll be preparing the machines for delivery at our premises in Biel.

Your profile:

- CFC in mechanical or automation engineering
- Willing to travel most of the time (60%) and be flexible.
- A few years' experience in a similar position, either as an after-sales technician or sales representative, ideally in the machine tool sector.
- French or German mother tongue with good knowledge of the other language and very good knowledge of English (Italian an asset).
- Enjoys customer contact and solving complex technical problems.
- Category B driver's license
- Good presentation and communication skills (open to training our customers)
- Resistant to stress, customer-oriented, flexible and able to show initiative and autonomy in the performance of his work.

We offer you :

We offer you a responsible job with a wide range of activities, an attractive working environment and the benefits of an international group.
